The increasing cost of wood in this ountry has led to a great number of exeriments in preserving all kinds of wooden structures exposed to the weather from Among the more recent plans suggested is one for impregnating wood with asphalt, combined with some antiseptic material. The finished wood, ready to be put together, is first submitted to heat to drive out the moisture, and is then placed in a hot bath composed chiefly of asphalt and carbolic acid. On cooling, the solvent of the asphalt evaporates, leaving a skin or coating of the asphalt on the sur-face of the wood that resists water and keeps the antiseptic material securely locked within the pores of the wood. The exterior of the wood presents a smooth, black surface that does not need to b painted. The process is about to be tried upon a large scale.

The tone of the market, however, is a shade stronger than at the close of last week. Advices from Liverpool denote an advance at that point, and local holders, therefore, feel encouraged with the prospect. Although \$1.70 is considered the top market figure, it is questionable if any large quantity that figure, it is questionable if any large quantity that figure, it is questionable if any large quantity that should be stictly classed as No. 1 c add be obtained at that rate. No one could be found this morning who was willing to deliver No. 1 White in July at anything below \$1.72\frac{1}{2}\$, while the extreme buying limit was \$1.70 \( \) ctl. For August and September deliveries, \$1.71\frac{1}{2}\$ ctl was bid.

MEDBLE-AGED MEN.

There are many at the age of thirty to sixty who
are troubled with too frequent evacuation of the
bladder, often accompanied by a slight smarting of
burning sensation, and a weakening of the system in
a manner the patient cannot account for. On examing the urinary deposits a ropy sediment will often
be found, and sometimes small particles of albumen
will appear, or the color will be of a thin milkish
hue, again changing to a dark and torpid appearance.
There are many men who die of this difficulty, ignorant of the cause, which is the second stage of semlinal such cases, and a healthy restoration of the
genito-urinary organs.
